## **Retirement village residents going green**

Residents in Sanctuary Park Retirement Community are looking forward to helping the environment and taking advantage of potentially significant savings in electricity costs, as the installation of solar panels on their units comes to completion.

Retirement Living Coordinator Debra Winter said the residents jumped at the chance to have solar panels installed.

"We approached the residents about the idea of renting solar panels for their units, as we are always looking for ways to improve the services to our residents, as well as looking after the environment," Mrs Winter said.

"Being surrounded by a national park, and in a hinterland setting, many of our residents are very environmentally aware and were keen to do anything they could to reduce their carbon footprint. We had 100% of our residents put their name down for solar panels, which have now been installed in almost all of the villas."

Sanctuary Park Retirement Community is delighted to announce the launch of Stage 3 following the successful sell out of Stages 1 and 2.

You too can select your dream villa from a range of designs - however with only 18 units in Stage 3, they won't last long.

Our units are all architecturally designed with a range of modern conveniences including air-conditioning, dishwashers and an emergency response system in our two bedroom, two bedroom plus study and three bedroom duplexes now under construction.

Our Retirement Living Coordinator Debra Winter will be pleased to take you through the display unit, community centre and on a personalised tour of the village. For an appointment phone Debra on (07) 5476 4657.
